

Tips to crack IBPS – CWE

Introduction

Now – a – days preparing for an examination is no more old style .Gone are the days where school and college education & knowledge was enough to get a job in the Bank exams now days in India are very tough to crack as the no. of applicants are dynamically increasing year by year and the most attempted IBPS-CWE is by far a dream to many test takers throughout the country to crack in the first attempt.

Do not get depressed. Every problem has a solution. Check out some best and most beneficial tips to crack the IBPS-CWE exams with flying colors.

Tips & Tricks

1. By heart study or forced remembrance is always useless & will not fetch results.
2. Stay focused all the time. Maintain self-discipline & remember to crack the exam with winning spirit.
3. Assessment of strength & weakness in a particular subject or topic is always helpful.
4. Last minute preparation should be a quick scan but not Panicked & lengthy.
5. Drink adequate water & healthy food as the brain gets drastically affected without proper nourishment. Avoid eating huge quantities of junk food.
6. Concentration can be improved gradually. Do not force your preparation but learn each & every topic completely.
7. A Relaxed brain has more grasping power than a confused & stressful brain. Be cool & Relax before starting the preparation.
8. Best study environment is a peaceful place with no disturbance. You may listen to some soothing music for mind relaxation.
9. Spend quality time for performance analysis. It helps a lot in difficult subjects like mathematics, Aptitude & Reasoning.
10. Do not stick to books alone. Surf the web for recent trends, technology updates, Current affairs & political scenarios.
11. Concentrate on improving knowledge and not on cramming up volumes of data into your brain.
12. Active reading is always necessary. Preparing for competitive exams should be done with interest & confidence.
13. Follow the 3 golden rules of Preparation which are
 - a) Attentiveness.
 - b) Alertness.

- c) Applying the right strategy on the exam day.
14. Brain fade (Forgetting the memorized content) is an important factor to take care upon.
 15. Make it a practice to study on daily basis at regular intervals.
 16. Practice the problems & gradually increase the speed for accuracy & correctness.
 17. Set the goal to be reasonable & not very high which always results in disappointment.
 18. A knowledge input from experienced authors always comes in handy. Especially when preparing for competitive exams.
 19. Research on a single question based on multiple references available via internet.
 20. Read the whole question first. Mis judgment is always dangerous especially in multiple choice questions.
 21. Study times should be scheduled & must be followed strictly.
 22. Attempting numerous questions at a single time is practically impossible. So never do that mistake.
 23. Panic & mental stress are the main biological factors for the students which if not regulated results in disasters.
 24. Socializing with people, Playing with pets will smoothen the mind & improves exposure to the society.
 25. Brainstorm sessions, Group Discussions etc. Will help you answer various questions swiftly.
 26. Various online portals are available for self-study with bundles of materials available online.
 27. Special care should be taken on English & vocabulary as 95% competitive exams throughout the country are based on English.
 28. Active readers are estimated to be the most successful candidates in IBPS Exams.
 29. Apply constructive methods like writing, reading & calculating your answering speed / Capacity are always preferable & result oriented.
 30. Setting up reasonable goals rather than illogical goals fetch the desired results.
 31. Mocking up the brain with difficult questions in order to prove toughest is a very bad practice put on by students. Don't do it.
 32. Always dream big so that you can achieve big. There is nothing wrong in dreaming big but the same spirit should be seen in preparation.
 33. Day by day activity must be executed in such a way it ultimately affects the performance in the exam.
 34. Updating skills & knowledge in contrast with the subject discussed should be preferred.
 35. Do not get deviated from preparation with un- necessary discussions with family & friends.
 36. Give top priority to exam preparation & avoid roaming & chit chatting un- necessarily.

37. Small trips are ok where you return back in a day or two. Extremely long vacations will tamper the study flow & affect the overall preparation.
38. Mistakes if found should be corrected instantly. If not discovered in early stages may develop into serious flaws which are usually resulted by carelessness.
39. Monitor the test time and take decisions wisely when attempting the IBPS-CWE exam.
40. Take help of online test practice portals like www.entranzz.com which offer updated test every day.
41. Evaluate yourself on tests & your performance regularly. Check the areas of weakness first & check the mistakes which are constantly repeated.
42. Increase in – depth knowledge on various levels of learning based on previous year question papers where there is a slim chance / possibility of repetition of questions.
43. Develop & implement new strategies of learning, thinking & remembering as well.
44. The day of the exam is the most important day in your life as the whole year’s practice; effort & time are kept to test on that single day itself. So don’t take a wrong step.
45. Thinking is always a nice option rather than following the group. New ideas & concepts will result in better functioning of the brain & helps in the answering skills.
46. According to a biological survey on students. Major part of the stress to the brain comes from eye strain & other activities which are results of over preparation. Relax & take a break .then resume studying.
47. Attempt the questions which you are thorough in first. Choose to answer the tough questions later on.
48. Negative marking is prevalent in IBPS – CWE so a set of mistakes will decrease your rank drastically.
49. Create a study routine everyday & make it a habit of analyzing weekly, monthly test performances to know of any drawbacks & overcome them with precision & perfection.
50. Develop mental skills & physical health so that you train yourself to be logical & always attempt the questions carefully taking into consideration years of practice & efforts. Stay calm & confident.

Hope so the students take the above tips & tricks into consideration & practice well for the upcoming exams & clear the competition with amazing ranks & build up a successful career.

All the best.
